

Botan::TLS_Connection

```
classDiagram
    class BotanTLS_Connection["Botan::TLS_Connection"]
    class BotanTLS_Client["Botan::TLS_Client"]
    class BotanTLS_Server["Botan::TLS_Server"]
    BotanTLS_Client --|> BotanTLS_Connection
    BotanTLS_Server --|> BotanTLS_Connection
```

The diagram illustrates a class hierarchy. At the top is the class 'Botan::TLS_Connection'. Below it are two classes, 'Botan::TLS_Client' on the left and 'Botan::TLS_Server' on the right. A horizontal line connects the two bottom boxes, with a vertical arrow pointing upwards from the center of this line to the bottom of the top box, indicating that both 'Botan::TLS_Client' and 'Botan::TLS_Server' inherit from 'Botan::TLS_Connection'.
